PROFILTEK, the leading company

PROFILTEK is the leading company manufacturing shower enclosures in Spain and Portugal. The company philosophy is fully oriented to enhance the user experience, offering a complete range of high quality shower enclosures at the forefront of design and innovation.

Our HQ in Valencia (Spain), with a surface area exceeding 30,000 m², are entirely dedicated to the production of shower enclosures and technological resources offer the highest possible performance, aiming for quality and traceability. Local stocks and comprehensive logistics enable us to offer unbeatable lead times and extraordinary reliability.

PROFILTEK's vision is to consolidate its position as Europe's best shower enclosure specialist.

Our knowledge of the product and its layout in the shower space, together with our expertise in design and manufacturing as well as our attention to customers at all times, allows us to offer solutions that meet all your expectations.

Our day-to-day work, in close collaboration with our distributors, builds our mission to serve the end user: To create and provide spaces and environments that allow everyone to enjoy showering.

AWARD-WINNING KEISY SERIES, RECIPIENT OF A PRESTIGIOUS DESIGN PRIZE:

DESIGN AWARD 2020

The iF DESIGN AWARD is the world's largest design competition in terms of products, packaging, communication, interior design and professional concepts. The iF DESIGN AWARD is the oldest independent design label in the world.

Functionality, customisation, design, innovation. These four elements of a single enclosure are capable of giving any bathroom balance and elegance.

PROFILTEK, official sponsor of WORLD DESIGN CAPITAL.

The World Design Organisation (WDO) ® is an international non-governmental organisation promoting the profession of industrial design and its ability to generate better products and systems, more competitive businesses and industry, and ultimately a better environment and society. As the international voice of industrial design, the WDO advocates, promotes and shares knowledge about industrial design innovation that has the power to create a better world.

Valencia World Capital of Design 2022 represents the sum of both our own efforts and those of third parties. From this work and enthusiasm, parallel projects are emerging that meet the objectives of the Capital and are in line with one of the sustainable development goals for 2030 promoted by the United Nations in terms of sustainability and social justice.

10 YEARS
Spare parts supply guaranteed

We'll do anything for our distributors

PROFILTEK's network of distributors is the driving force behind most of our strategic decisions.

Our mission is to offer beautiful, functional and adaptable shower spaces to each customer.

Our aim is to offer the user the best sensations during a relaxing shower.

To do this we put all our technical and human resources at your disposal to facilitate the sales process, simplifying your work and optimising the profitability of your business.

For your convenience, the **identification code** of your PROFILTEK enclosure is provided inside the logo that accompanies our products.

By removing the upper "PROFILTEK" cover from the enclosure, you will be able to access its identification code, a reference number that allows us to determine the manufacturing history of your PROFILTEK product; it will be indispensable when ordering any spare parts you may need or submitting any queries concerning that item.

We want our distributors to be able to satisfy their customers as well as possible thanks to PROFILTEK. This motivation is why we offer a 10-year guarantee on our spare parts.

Certified Guarantee.

The excellence is one of our priorities. In order to achieve it, we employ the best quality in terms of materials and processes for our products, according to the European Standards EN 14428:2016 and the CE marking, which set the requirements for the shower enclosures' manufacturing.

- Optimal enclosure properties.
- Resistance to corrosion.
- Resistance to dry-wet change.
- Durability and stability.
- Maximum watertightness.
- Easy cleaning.

Our own quality control laboratory.

Our in-house Laboratory allows us to carry out full quality controls, in order to assure the strict compliance of all regulations.

- Safety: European standard EN 12150-1.
- High quality profiles: European standard EN 12220-1.
- Highly resistant coatings: DIN EN ISO 2409.
- Glass for building: European standard EN 12150.
- Profiles and coating: European standard EN ISO 8994.
- Corrosion in artificial salt-fog atmospheres EN ISO 9227.

Certified Quality.

These images show the standard tests carried out on a sampling of aluminium profile.

You can appreciate a standard chromated aluminium profile sampling from Profiltek compared to another manufacturer's sampling having the same characteristics.

Contract solutions for your projects.

Profiltek offers a wide variety of configurations, finishes and alternatives for the creation of shower spaces, enabling a multitude of solutions for contemporary architecture.

Innovation, technology and aesthetics are fantastic tools in the hands of anyone who knows how to use them. And who could be better than you at doing that? We are aware that effective distribution of shower space and suitable decorations are undoubtedly decisive elements in fully enjoying this room.

That is why we can offer the professionals at CONTRACT all the possibilities presented by Spain's leading manufacturer of shower enclosures, with more than 30 years of experience and dozens of successful projects as a reference.

Do you have a project? Tell us about it! We will be delighted to help you make it a reality.

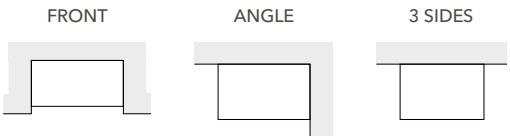
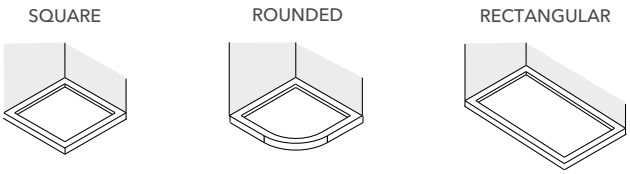
How to choose the ideal enclosure?

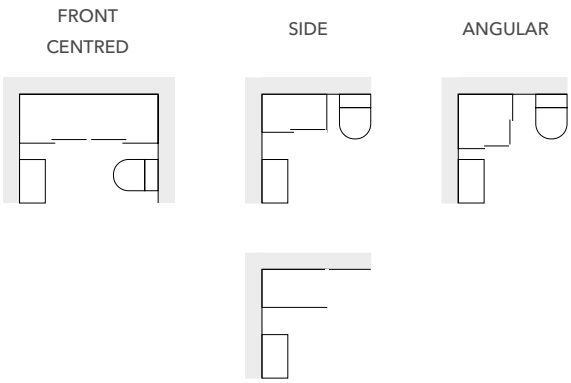
1 Space to be covered



2 Shape of the tray



3 Access to the shower

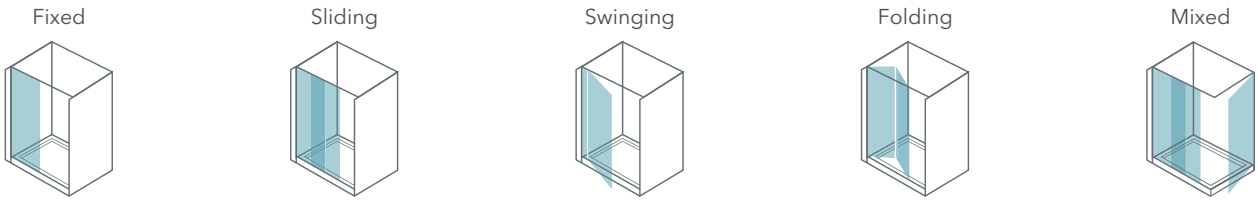


4 Who will be using the shower?

For **people with reduced mobility and/or disabilities,** it is important to make the most of the shower entrance space and ensure that the enclosure is easy to open. The PMR models are a perfect option in cases where external assistance is required.

When **children** use the shower, it is very important that the enclosure be easy to open. It is advisable to choose sturdy enclosure models with suitable profiles and swingings, sliding or fixed doors.

5 Opening



6 Choose the model

To help you, we have created a table on the following page that summarises the features of each model.

7 Customise to your taste

Make sure you choose elements that blend well with the rest of your shower space, the décor of your home and your personal taste.

*Table of general features. For more details, we advise you to check the features and notes applicable to each Series.
* See "offset" under the features of the Series.

SEALING LEVELS

Depending on the type of enclosure chosen, small amounts of water may seep in and out of the shower due to the installation, use or features of the enclosure. As a guide, we have divided our products into 3 levels:

LEVEL 1 - HIGH
Shower area with lower profiles. Highly watertight enclosure. Minimises the appearance of splashes.

LEVEL 2 - MEDIUM
Shower space with reduced profiles. Enhanced elegance and design. Watertightness is not guaranteed. Some splashes may appear.

LEVEL 3 - LOW
Open shower space without profiles. Strong emphasis on elegance and design, easy to clean. Low watertightness. Water splashes are common.

TEKNOCLEAN

Our DNA is clearly marked by innovation in the development of new solutions that help improve the customer experience. This innovation gave rise to **Teknoclean**, a clever system that can be applied to the inside surface of the glass, forming a protective film that repels liquids and reduces dirt and limescale build-up, providing impeccable, fast and long-lasting cleaning.

After numerous rigorous resistance tests, a **Profiltek study**, which has obtained optimal results, has certified the effectiveness and reliability of the Teknoclean system and guarantees that its application methods ensure effective adhesion, allowing faster and more convenient cleaning of enclosures.

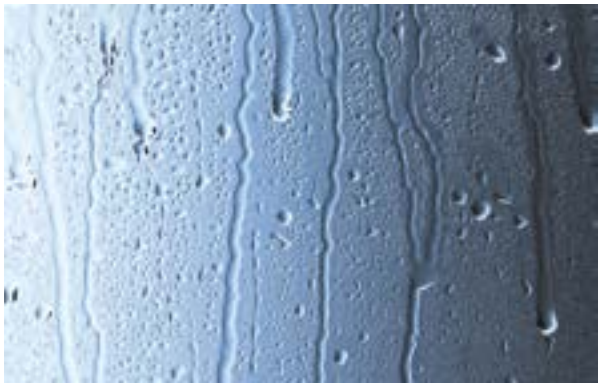
Some of the main benefits of using **Teknoclean** on enclosures are, among others:

- Easier cleaning.
- As-new appearance and enhanced durability.
- Reduction of scale and contaminant deposits.
- Non-sticky surface.
- Resistant coating to standard cleaning products.
- Protection against stubborn stains such as oil or greasy substances.

TEKNOCLEAN: 4000 scrubbing cycles. **8 years without limescale*.**

TEKNO CLEAN INCLUDED in the glass

WITH TEKNOCLEAN



WITHOUT TEKNOCLEAN

* The Teknoclean treatment is not self-cleaning, so we advise you to clean your enclosure regularly using the products recommended by the manufacturer. The durability of the treatment can be up to 8 years if proper maintenance is ensured.

Cleaning and maintenance

YOUR ENCLOSURE - ALWAYS CLEAN

Profiltek has developed the TEKNOCLEAN system, a treatment for enclosures which is applied to glass and forms a protective layer that is impermeable to liquids and minimises limescale and dirt incrustations, maintaining an as-new appearance for longer. This innovative system makes cleaning faster, more efficient and less laborious.

Even with TEKNOCLEAN, all enclosures require minimal maintenance to keep a clean, flawless appearance. Preserving an enclosure spotless is very simple - just follow this series of practical tips.

Moisture is the main enemy of enclosures because it encourages the growth of bacteria and mould. A practical way to keep the glass enclosure in good condition is:

- To ventilate the bathroom.
- To dry the enclosure after each use, using a cloth that does not leave residues or lint or, failing that, with a window washer with a rubber squeegee.

CLEAN YOUR ENCLOSURE FREQUENTLY

- Choose cleaning products that are not aggressive to metal surfaces and never use abrasive cloths, sponges or objects that could damage the surfaces.
- Use only neutral, non-acid and non-reactive products, avoiding (for example) bleach, ammonia and acids as they can scratch or damage the glass, especially if the enclosure has received special treatment beforehand.
- Do not use acid descalers or products containing sodium hypochlorite, sodium hydroxide or products unsuitable for cleaning lacquered surfaces; this includes any detergents that are abrasive, chlorine-based or contain bleach or solvents as they may damage the anodised frame and the paint. The use of these products can cause corrosion, blistering on painted profiles and deterioration of the silkscreen printing.

CLEANING

1. Apply the cleaning product to the enclosure.
2. Leave it on for a few minutes.
3. Rub with a non-abrasive sponge and dry thoroughly until clean and shiny. This process is always the same, so it is advisable to dry the surfaces of the enclosure after each use, especially in the lower areas, to prevent any remaining water from damaging the finish of the metals or other accessories.

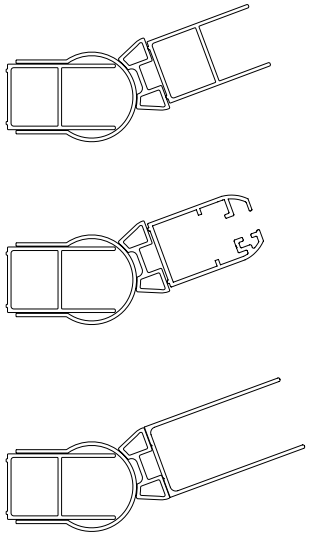
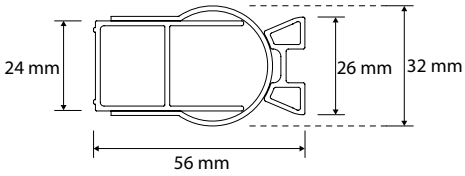
EXAMPLES OF CONFIGURATION WITH DEGREE PROFILES

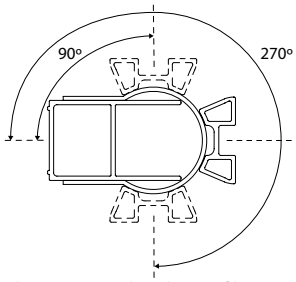


GENERAL MEASUREMENTS



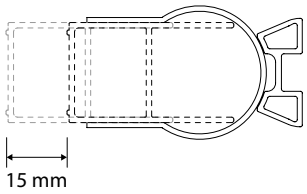
The set of straight profiles measures 56 mm. The width of the wall profile is 24 mm, while the profile marking the degrees is 26 mm wide. The diameter of the circular profile is 32 mm.

POSITIONS



The positions that the profiles can take up range from 90º to 270º.

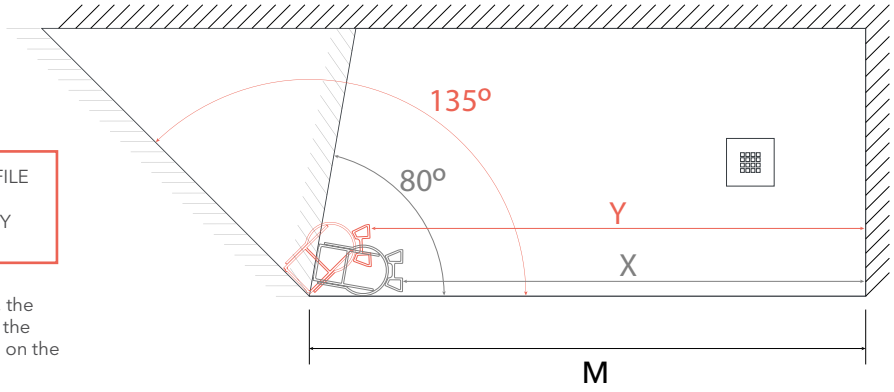
OFFSET



The compensation the degree profiles allow for is 15 mm.

DIMENSIONS OF THE ENCLOSURE: X ≠ Y

THE POSITION OF THE DEGREE PROFILE ENSEMBLE MUST BE TAKEN INTO ACCOUNT WHEN TAKING THE X ≠ Y MEASUREMENTS



For spaces with the same dimensions (M), the size of the enclosure can vary as shown in the diagram; the X and Y dimensions depend on the degrees of the shower tray.

The sides of the existing walls must be indicated.

PROFILTEK

N KONVERT HIT is now available in Black and Glossy Chrome

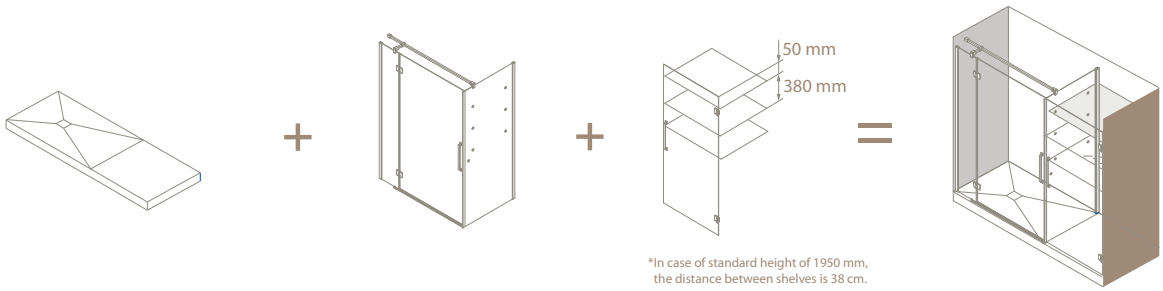
N Optional closet with adjustable shelves

N Now available with side fixed panel

Konvert SOLUTION

Kit to replace a bathtub with enclosure + shower tray + storage space.

Konvert SOLUTION



*In case of standard height of 1950 mm, the distance between shelves is 38 cm.

Turn your old bathtub into a new shower space with a large storage area.

1. Choose finish and dimensions of your KONVERT* shower tray.
2. Install your shower tray and inform us of the enclosure model and the dimensions of your space.
3. Install your enclosure and closet. **It's as quick and easy as that.**

FEATURES:

» Front enclosure with hinged closet panel.
» 6 mm-thick tempered glass.
» Closet with two shelves and cover in Acid finish.
» Turin handle (Chrome or Black) as standard.

FEATURES:

» Profiltek, with more than 30 years of experience in designing products for the world of showers, fulfils the satisfaction and expectations of its customers and, most importantly, of its users by offering the XXL range. It may not seem innovative at first glance, but a larger shower enclosure provides enhanced comfort:
» No more stabiliser bars too close to the shower heads.
» Better protection against splashes.
» A wide range of solutions to meet your expectations.
» Tempered glass is available, 6 mm or 8 mm.
» Glass with Tecknoclean treatment.
» Wide choice of profile colours depending on the model: White, Matt White, Matt Black, High Gloss Silver, Silver and Matt Gold.
» Equipped with contact or magnetic seal closures.
» Several choices of optional handles.
» Heights can range from 2200 mm to 2600 mm depending on the series model.
» A solution that complies with the SECURE SPACE standard. French electrical standard NF C 15-100/A5.
» A more functional, chic and elegant shower offering 'XXL' comfort.

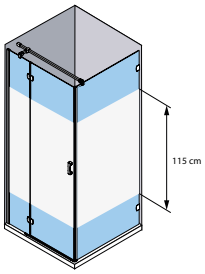
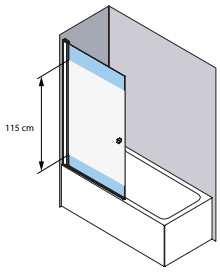
MEASURES OF DECORATIONS

The height of the decoration is always fixed, both for our designs and those provided by our customers: 1150 mm.

There are no limitations for satin-finished glass.





ADDITIONAL INFORMATION

- Digitally-printed satin finishes are not available for curved enclosures. The sandblasting technique will only be provided for curved enclosures. Decorations marked with (*) are not available for curves with sandblasting.
- Decorations presented on Fixed One (OB-2000) model. The finishes, tones and features seen in the images shown may vary from the final result. These images are not contractually binding upon the manufacturer or distributor.

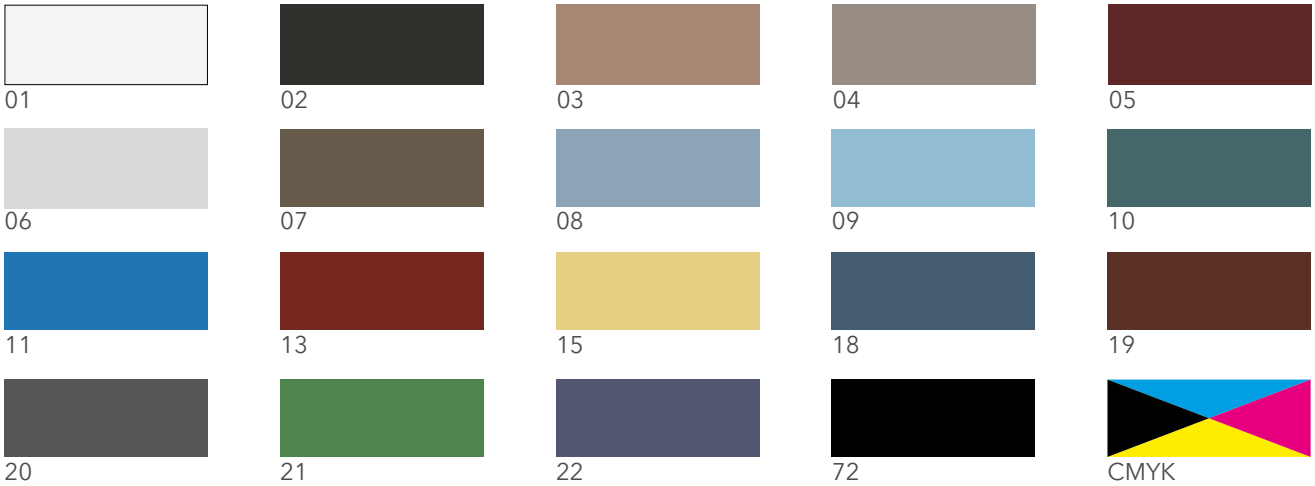
A world of possibilities at your fingertips

FEATURES

- Printing in 6 colours CMYK+White+Green (CMYKWG).
- Printing with ceramic inks.
- Maximum print resolution used: 1440dpi.
- Printed on Extra-clear, Blue and Smoke Grey glass.
- Option for customised decorations. **Please check feasibility, estimates and deadlines with Profiltek.**
- All our products can be printed except for the following: PMR, Stock and curved enclosures.
- Continuity of the graphics is ensured regardless of the number of glass panes and the size of the print of each bath enclosure model.
- Scratch-resistant.
- Choice of multiple colour options - please contact our Customer Service team.
- Application of printing on different areas of the enclosures depending on the type of graphic.
- The colours shown in the catalogue correspond to the appearance from exterior side of the enclosure, with a colour difference from the interior side.

COLOUR SCHEME

IMAGIK offers the option to choose various alternatives: a range of colours and print placement options. In this way, the customer has many options to decorate enclosures as desired, **subject to validation by our Technical Service team.**



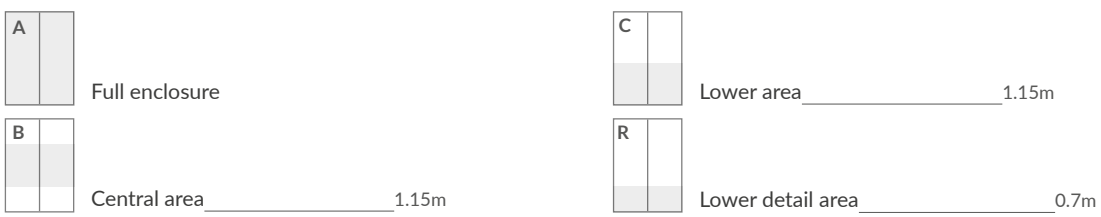
Available inks for Smoke Grey glass: ref.01 and 72. / Inks available for Blue glass: ref.01 and 11.

Possible printing areas

In all our themes, IMAGIK allows you to apply a selected image to different areas of enclosures. Depending on the patterns chosen by the customer, it is possible to integrate the image into the central, lower or upper section, or even the entire glass.

SHOWER

APPROXIMATE HEIGHT



NOTE!

- Imagik is not available for the PMR, Stock and Curved enclosure series.
- Digital printing is done on the inside of the glass of the enclosures.
- The graphics will be applied from left to right depending on the configuration and the selected enclosure model (seen from the outside of the enclosures).
- A glass panel must be more than 250 mm wide to be printed. For all other limitations, ask for details regarding each Series or model of enclosure.
- The dimensions of the printing surfaces are approximate.
- The colours shown on the graphics in the catalogue or on the website are merely indicative. After the application of translucent colours, the tones can be modified by a few factors, such as the degree of opacity of each colour, the tone of the background where the image is applied or the intensity of the light in front of or behind the glass.
- Any product not appearing in the catalogue will be treated as a special product and will be subject to a specific quotation and delivery time communicated by Profiltek. If customisation is desired, please see the price list of each Series.
- Four-colour process decorations are not available for Smoke Grey and Blue glass panels.

APPLICATION OF THE IMAGE ON THE ENCLOSURE

The printing of an image on the enclosure does not cover it entirely, but is limited to a certain area. This area can be A, B, C or R and is determined by the width of the enclosure requested by the customer.

It is important to know that the Imagik printing process always starts from left to right, seen from the outside, regardless of the configuration of the enclosure.

POINTS TO REMEMBER

- The blue background of the graphics represents extra-clear glass. See example 1.
  Type A graphics are printed from the bottom of the glass, covering the entire enclosure. See example 2.
- The digital printing of the Vita, Wind, Nell, Hit, and Keisy enclosures shows an overlap of the panels, creating a visual effect that makes the printed overlap area appear darker. This is due to the superimposition of translucent coloured areas. See example 3.
- The size of the height of the printed area named "A", "B", "C" and "R" is the same for baths and showers. See example 4.
- In the case of the Relax, Siluetas and Leaves graphics, special heights of less than 1800 mm will not be offered. These graphics are only available in shower enclosures. See example 5.
- Please take into account that the continuity may be interrupted by the aluminium profiles. In this case, the digital printing does not take into account the spaces on the glass that are hidden by the profiles.
- In the case of graphics with large masses of colour, a so-called "football field" effect can occur. This is a normal effect whereby faint traces of the passages of the print heads may be visible.
